Authentic4D Radiologist Break Down:

- 300+ [fellowship trained sub-specialized radiologists](#)
- 50 states covered
- 6-point radiologist vetting process
- 100% willing and able to testify
- 90% clinical (not claims!) work required
- 80% of the time can opine on if an injury was legitimate or preexisting

Studies show fellowship trained sub-specialized radiologists disagree with generalized radiologists up to 37.9% of the time, and that treatment changed after a fellowship trained radiologist read in 24.8% of cases. As such, the importance of the extra training a fellowship trained radiologist goes through is paramount to accurate and efficient patient care. That training allows them to determine more than 80% of the time if an injury was acute or chronic/preexisting.

A4D has 300+ fellowship trained radiologists across all 50 states who focus 90% of their time on clinical work, not claims. Combat claims abuse and only pay for claims you owe with our [secondary imaging review program](#) or our new [end-to-end quality controlled primary network for Work Comp claims](#).
